

C-AIRE
COMPRESSORS

Quality built... *because quality lasts.*

5 HP

16.0 CFM @ 175 PSI

LxWxH: 35" x 24" x 70"

2 Stage

PUMP RPM: 1050

WEIGHT: 515

Suitable For: Light Commercial Use

- 1-2 person Auto Repair Shop
- Serious Hobbyist at Home or on a Farm

This two stage compressor has long been a popular C-Aire model. Two stage compressors are more efficient at maintaining higher air pressure and volume than single stage compressors. This unit features a magnetic starter, cast iron cylinders, insert rod bearings, and deep finned intercooler and aftercooler.

- **5 HP Single Phase/230v Motor**
 - 22 running Amps (Requires 40 Amp breaker)
 - Pre-wired Magnetic Starter
- **Large Displacement 2 Cylinder Pump**
 - 16.0 CFM @ 175 PSI
 - Solid Cast Iron Cylinders
 - Rod Inserts & Ball Bearing Mains
- **80 Gallon Vertical Tank**
 - ASME certified
 - Also available on a horizontal tank
- **Make your life easier with an Installation Kit!**
 - Kit Number: 110-0025
 - Steel braided flex hose
 - Oil Drain Tube
 - Ball Valve Drain Kit
 - 4 Anti-Vibration Pads & Anchor Bolts

Moisture Removal Solution

Get your C-Aire compressor set up correctly from the start. A Belt Guard Mounted Aftercooler and Electronic Tank Drain combination is an affordable way to significantly reduce moisture and prolong the life and effectiveness of your pneumatic tools by removing approximately 60% of the moisture in your compressed air.

The aftercooler is mounted directly to the unit's belt guard and utilizes the air drawn in by the flywheel for cooling before the air reaches the tank.

The 110 volt Electronic Tank Drain has adjustable open and close cycles, allowing you to adjust the drain time and frequency to keep your tools and equipment dry.
